9	4FO201022	The school, the family and the local environment	2	2+2+1	2	6	Faculty of Educational Science

The study program in Acquiring Teaching Competencies, through integrated scientific knowledge in the field of education, offers opportunities to create professional and research-oriented individuals who holistically understand the functioning of the educational system. This entails excellent knowledge of the principles in pedagogical activities, especially in the educational process, as well as in the processes of planning, modeling, and controlling within it.

Through the elective subjects offered in the study program, students can specialize in working and researching in schools, preschool institutions, as well as in institutions with educational and caregiving purposes.
